

novaConnect™

Question	Answer
Does novaConnect support Notes and Google recurring events?	Yes.
Does novaConnect support Notes and Google all-day and multiple day events?	Yes.
Does novaConnect support Google recurring events with no end date?	Yes. novaResourceSync will push to Notes all instances of an endlessly recurring event for at least one year.
Are the synchronizations in novaConnect real time?	<p>Searches for Lotus Notes free time from Google Calendar are in real time. When a Google user uses Google Calendar's <i>"Find a time"</i> feature, the user's browser will connect to the Notes server and obtain Notes free time information.</p> <p>Searches for Google free time from Lotus Notes are not in real time. novaConnect relies on Lotus Notes scheduled agents which run every five minutes. With the proper configuration of novaConnect, you can achieve close to real time results (within a few minutes); however, the tool is not designed to be a real time sync process.</p>
Do I need a dedicated server to run novaConnect?	We recommend a dedicated server (or virtual machine) in most occasions, as the tool does have fairly specific Domino Server Document setting requirements. If you have many rooms and/or many events within those rooms, the sync agent will be running often.
I would like to use your	Yes. novaConnect and novaResourceSync are

<p>novaConnect tool along with novaResourceSync. Can I place novaConnect and novaResourceSync on the same dedicated server?</p>	<p>designed to “play nice together” and can be co-located on the same server.</p>
