

novaConnect™

<p>New features and enhancements included in version 4.7 of novaConnect</p>	<p>Added an option to the application profile that enables the administrator to swap the Google domain name with the Notes domain name when searching for a Notes user's free time via the Incoming agent. This allows the novaConnect tool to support clients that have different Notes and Google domain names.</p> <p>Optimized the Incoming agent. It will not attempt to perform the free time search for users not in the Notes domain.</p>
<p>New features and enhancements included in version 4.6 of novaConnect</p>	<p>Improved wording of authentication scenario options in application profile.</p> <p>Improved diagnostics form. Diagnostics form checks MS XML Client, HTTP connection to Google servers, JCE Policy files, OAuth 2.0 authentication, and user free time search.</p> <p>Corrected authentication issue that occurred with syncs that ran for more than one hour.</p> <p>Improved error handling when a user mail file has exceeded its mail quota.</p>
<p>New features and enhancements included in version 4.5 of novaConnect</p>	<p>Added <i>Most Recent Sync Start</i> and <i>Most Recent Sync End</i> fields to Person documents.</p> <p>Simplified user interface. Removed embedded views from application profile.</p> <p>Improved Outgoing agent. It now syncs changes since last successful sync date of the Person document. If syncing a Person document for the first time, the Sync agent will sync all Google events with a future end date.</p> <p>Added <i>Import from Notes</i> action button to Person Documents view.</p> <p>Added <i>Import from CSV</i> action button to Person Documents view.</p> <p>Improved handling of date changes in Google Calendar entries that have already been synced to Notes.</p>

New features and enhancements included in version 4.4 of novaConnect

Improved handling of Google Calendar entries that have been marked as "Available". These calendar entries will not be synced to Notes.
