

# novaMigrate™ Server-Side

<p><b>New features and enhancements included in version 7.3 of novaMigrate™ Server-Side</b></p> <p>March 3, 2014</p>	<p>Added functionality to migrate Lotus Notes custom developed applications to Google Drive.</p> <p>Added functionality to migrate Lotus Notes Team Rooms to Google Drive.</p> <p>Added ability to push meta data to migrated Drive files.</p> <p>Added Access Control List report to log files created during a migration.</p>
<p><b>New features and enhancements included in version 6.8 of novaMigrate™ Server-Side</b></p> <p>September 30, 2013</p>	<p>Added functionality to migrate Notes Document Library databases to Google Drive.</p> <p>Improved export process to ensure uniqueness of directory structure created.</p> <p>Added functionality to migrate Notes Discussion databases to Google Groups (or users as needed).</p>
<p><b>New features and enhancements included in version 6.5 of novaMigrate™ Server-Side</b></p> <p>August 5, 2013</p>	<p>Added functionality to migrate a user's calendar to single PDF document. This allows us to capture a user's entire calendar for historical purposes prior to moving off Lotus Notes.</p> <p>Improved migration times.</p> <p>Added increased logging capabilities.</p> <p>Fixed issue of worker file size growing too large.</p> <p>Increased fidelity of privacy flags.</p>
<p><b>New features and enhancements included in version 6.0 of novaMigrate™ Server-Side</b></p> <p>October 22, 2012</p>	<p>Added full OAuth 2.0 support for increased security.</p> <p>Added full multi-domain support.</p> <p>Added full multi-threading, which enables the simultaneous migration of hundreds of users on the same server.</p> <p>Added full batch support for calendar and contact migrations.</p> <p>Added ability to migrate Notes mail-in databases to Google Group (or users if need be).</p>

	<p>Migrates Sametime chat logs to Google Mail.</p> <p>Added option to exclude mail messages that contain specific fields from mail migration.</p> <p>Added ability to migrate calendar event attachments to the user's Google Drive along with a link to the attachment appended to the migrated event.</p> <p>Added ability to fan out or not to fan out. This allows us to seamlessly migrate in phases.</p> <p>Added ability to swap out organizer and attendee email addresses. This allows us to run a full migration to a test Google domain prior to running a true production migration. Test migrations can be timed and data can be checked for fidelity prior to running an actual production migration.</p> <p>Added full integration with <a href="#">novaResourceSync™</a> and <a href="#">novaConnect™</a>.</p> <p>Added ability to migrate contact attachments (Briefcase files) to the user's Google Drive along with a link to the Drive document nested in the migrated Contact record.</p> <p>Fixed On Resume issue when encountering private views.</p>
<p><b>New features and enhancements included in version 5.8 of novaMigrate™ Server-Side</b></p> <p>November 7, 2011</p>	<p>Improved preservation of unread/read marks in mail messages.</p> <p>Added ability to leverage secure IMAP (port 993) and/or Google mail API over HTTPS (port 443) for mail migrations.</p> <p>Added ability to exclude folder(s) when performing mail migrations</p> <p>Maintains all mail message header information.</p> <p>Added much more ease and flexibility when moving migration docs from one server and/or novaMigrate database to another. Simply copy/paste the migration doc as needed.</p> <p>Added ability to send end user "Migration Complete" email which includes a full migration statistics report along with a direct Notes link back to any items which failed to migrate. Can toggle on/off for ALL types of migrations (Mail, Cal, Con, etc)</p>

	<p>No design changes made to user's mail files.</p> <p>System now converts all date and time settings to Universal Time, thereby eliminating any time-zone issues/concerns.</p> <p>Migration room and resource event data.</p> <p>Now Migrates ALL standard fields from Notes contact records to Google Personal Contacts.</p>
